<b>Description</b>			
When customer opens a new FD account, and it is successful, customer will be called to log in to transfer money to the FD receipt.			
When the customer login, they should see the fund transfer transaction with the "to account type and account number" prepopulated with the new FD receipt number. But the attached image shows that these information was not pre-populated.			
Without this information, the customer will not be able to transfer money into the new FD receipt.			
Please check. Thanks.

Megat - Enhancement [#13000](#) - FD on-boarding when customer login new account information not pre-populated

Root Cause: Previously, FE took value from activeOnlineAccounts > obAccountSpecificBean thus only applied for CASA  
Solution: Fixed by taking value from ownCurrentAccList for CASA, ownFixedDepositAccList for Fixed Deposit
