Root Cause of the image stretch, the original pixel of the image is 400 X 267, while the UI component size is shorter, hence the image stretched.

Solution: To increase the height from 13px to 19px.

Impact: In order to make the image to look normal, the height will be increase hence it will occupy more space in the homepage.

Alternative Solution: To replace the image with different pixel 300 X 267
