#####

I have checked the code for adding gold favorites. But I'm having trouble because I can't see the complete code. In the picture I sent:

1. The process calls the openEmasAddFav method in the DashboardActivity.java file line 693 which calls EmasInterface.java line 330. It can be seen that emasHasFav (boolean) is set to false

2. I made a log to see the detailed response to point 1. I got emasHasFav set to true. Then I checked whether the openEmasAddFav method was called from another code. It didn't exist, it was only called on DashboardActivity.java line 693.

3. Is the entire SS code openEmasAddFav
