Android - Secondary Device Login flow re - adjustment

03 July 2023 09:33 AM - Jimmy Phang

Status:	Resolved	**Start date:**	03 July 2023
Priority:	Normal	**Due date:**	
Assignee:	Jimmy Phang	**% Done:**	0%
Category:		**Estimated time:**	8.00 hours
Target version:		**Spent time:**	0.00 hour

Description

Base on the scenario below - Screen flow re-adjustment needed:-

Secondary Device gets to clean/ clear the app data or uninstall while it is pending for approval.

Steps & Screen flow for 2ndary Device during login base on scenario above:-

- Launch App
- Display Landing Screen WITHOUT information
- User input credential to perform login by clicking Login Button
(FE needs to quickly call another time of RetrieveSecInfo before calling performloginv2)
(FE will able to get relevant information that returns from BE that indicate such device is still pending approval. This is to determine retrieveSecInfo response if there is device pending or on countdown then only proceed by clicking for calling loginv2)

Continue with BAU
- Display OTP
- Display Check Your Primary Device
