About the issue, which user data you are mention for?
Because Action list is based on user condition to list out.

Below is the condition provided by Aqila:

Primary – Active (View, Unbind Device)
Primary – Pending Approval Unbind (View, Approve/Reject Unbind)
Secondary – Active (View, Unbind Device, Change Primary)
Secondary – Pending Approval Unbind (View, Approve/Reject Unbind)
Secondary – Pending Approval Change Primary (View, Approve/Reject Change Primary)

As in video uploaded, all role access have been given into the user. But, it doesn't reflect on the role given since it can only be view for action (refer in the video)
- all role have been given but can only view
