Description Issue: 1. Incorrect wording for search country 2. Popup loading buffer after click search country button 3. Able to click dropdown list even after not select any country (Click search country button, without select any country and click close) 4. Bank list not instant popup just after select country Expected; 1. Button wording should change from 'SEARCH' to "SEARCH COUNTRY" 2. Should have no loading after clicked search country button, since country already retrieved after clicked 'ADD FAVOURITE' before, loading only happens after select any country 3. Dropdown list should not be able to click if not select any country 4. Bank list should instant popup just after select country
