Target version:		Spent time:	0.00 hour
Description			
Create package.json at mleb core project to server cc_core, cc_topnavbar and cc_auth			

History

#1 - 16 January 2024 02:41 PM - chok yee fan

checkout this whole MLEB Core project <https://dev.silverlakemobility.com/gitlab/mleb-solution-domain/smesd100/mleb-core>, and run the following

```
1. yarn install
2. npm run all:install
3. npm run all:start
```

It's will serve cc_core, cc_topnavbar and cc_auth. Access path <http://localhost:3000/>

navigate to cc_iam project open the file App.tsx comment out <Auth> as following

```
return (
  <AbilityContext.Provider value={ability}>    {/*<Auth authProps={props.appProps}>*/}
  <RouterProvider router={router} fallbackElement={<p>Loading...</p>} />    {/*</Auth>*/}
  </AbilityContext.Provider>
);
```

refresh the page. see everything is running as expected or not.

#2 - 16 January 2024 02:41 PM - chok yee fan

chok: mlebcore add package.json to install cc_core, cc_topnavbar and cc_auth and serve all services with single command

<https://dev.silverlakemobility.com/gitlab/mleb-solution-domain/smesd100/mleb-core/-/commit/4673d7d0b72335eed5fa740a9fc11d41a4ca5da9>
