Need to double confirm for the MLEB System is it systemCode(screenshot) or systemName(existing code).

#3 - 15 February 2024 02:05 PM - chok yee fan

as per discuss in the meeting, systemCode is for save, systemName is for display. map from the dataEntry ws to base on the systemCode pull systemName for display

Issue has been Fixed.

Go to MLEB Function -> click search button -> select the data in the table -> click modify button -> modify the MLEB System form -> (the "systemName" for display is correct)

Go to MLEB Function -> click search button -> select the data in the table -> click modify button -> modify the MLEB System form -> click save -> inspect and go to network -> select updateAction -> systemCode: "MLEB_COMMON" (the "systemCode" for save is correct)

#6 - 26 February 2024 04:51 PM - chok yee fan

- Status changed from Feedback to Closed

working as expected
