Target version:		Spent time:	0.00 hour
Description			
Optimization conducted - Android V37			
The WebView codes that have been excluded which optimized the speed on Android.			
Those webView coding originally have not been used since 2019 and those codes are not coded and tight with any fund transfer transcation functionality; Also, those code are not related to any other of fund transfer because it's only related to WebViewing URL linkage for web view purpose.			
as of why would those codes been staying there - it's actually for no purpose at all.			
I have also tried the Fund Transfer from Side menu - cross checking logs and the result was ok as it those displayed on confirmation screen and acknowledgement screen are valid. (also cross checked with developer)
