Pre-Development - Bug #20161

Naming errors in Ws code

19 March 2024 02:34 PM - Amirul Umar Pandai

Status:	Resolved	**Start date:**	19 March 2024
Priority:	Low	**Due date:**	
Assignee:	Amirul Umar Pandai	**% Done:**	100%
Category:		**Estimated time:**	0.00 hour
Target version:		**Spent time:**	0.00 hour

Description

Issue:
ACLRespBean returning "aclfunctionList", "aclsystemList" key (from **getACLFunctionAction** + **getACLSystemAction** JSON response)

Expected
ACLRespBean returning "aclFunctionList", "aclSystemList" key (following camelcase naming convention)

Meanwhile, found some typos appearing in multiple files:

- catetories (**UserProfileDaoImpl**, **UserProfileSearchParamBean**)
- assigment (**MlebSystemWs**, **UserRoleWs**)

History

#1 - 19 March 2024 03:04 PM - Farid Nazmi

- Status changed from New to Resolved

- Assignee changed from Farid Nazmi to Amirul Umar Pandai

- % Done changed from 0 to 100

already done .
