VELO Production Issue - Bug #22299

[External Audit Findings][Android] Weak Root Detection

29 July 2025 10:02 AM - yap chekying

Status:	New	**Start date:**	29 July 2025
Priority:	Low	**Due date:**	
Assignee:	Abdul Halim Baharom	**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:		**Spent time:**	0.00 hour

Description

Issue:
Rooting is the process of gaining administrative or privileged access to the Android OS. Without root detection, attackers or malware may access sensitive information stored on the device.

Recommendation from pentester:
Developers should employ better methods to detect whether an app is running on a rooted device.

Please refer to attached excel for details.

History

#1 - 29 July 2025 10:03 AM - yap chekying

- Subject changed from [External Audit][Android] Android: Weak Root Detection to [External Audit][Android] Weak Root Detection
