

VELO Production Issue - Bug #22303

[External Audit Findings][iOS] Weak SSL Pinning

29 July 2025 10:09 AM - yap chekying

Status:	Assigned	Start date:	29 July 2025
Priority:	Immediate	Due date:	
Assignee:	yap chekying	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Issue: During testing on iOS apps, the tester found that the app does not implement SSL Pinning. Without SSL Pinning, attackers can intercept and modify data transmitted between the app and server using invalid certificates, increasing the risk of data tampering. Recommendation from pentester: Developers should implement SSL Pinning. Please refer to attached excel for details.			

History

#1 - 29 July 2025 10:20 AM - He Xi Yeo

- Status changed from New to Assigned
- Assignee changed from He Xi Yeo to yap chekying
- % Done changed from 0 to 100

Added SSL Pinning, which compare server hashed public key compared to app's hashed public key.
