VELO Production Issue - Bug #22304

[External Audit Findings][MLEB] User Enumeration through Error Messages

29 July 2025 10:10 AM - yap chekying

Status:	New	**Start date:**	29 July 2025
Priority:	Immediate	**Due date:**	
Assignee:	Tan Hi Ann	**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:		**Spent time:**	0.00 hour

Description

Issue:
Error messages in an application can provide valid and invalid username information.
This information can potentially provide attackers with information for further attacks. This information allows attackers to perform brute-force attacks on the application.

Recommendation from pentester:
It is recommended to provide the same information in the error message so that it does not display whether the username is valid or not.

Please refer to attached excel for details.
